☎ 7520117177

📍 Mumbai

OBJECTIVE

Software Engineer with 4+ years of experience specializing in front-end development using React, Redux, JavaScript, and TypeScript. Skilled in building scalable, user-focused application, optimizing performance and ensuring robust testing with Jest and React Testing Library

PROFESSIONAL SUMMARY

- Technical expertise in **HTML5, CSS3, Bootstrap, JavaScript** and **React JS**.
- Proficiency in React Hooks, React-Router, React-Redux and Saga .
- Knowledge of **Node JS** and **Express JS**. Experience in creating APIs and writing schemas in Mongoose for **MongoDB** database connectivity.
- Implementation of connectivity with API services by using **Axios** and **Fetch**.
- Proficient in using **Git/GitHub**, Visual Studio Code.
- Experience in **Agile** Methodologies to enhance project efficiency and team collaboration.
- Ability to work effectively in any given environment and deliver high-quality products within timelines.
- Openness to embracing new technologies, taking on challenges, and quick adaptation to new environments.

TECHNICAL EXPERTISE

- **Front-End Technologies** : HTML5, CSS3, JavaScript(ES6+), TypeScript
- **State Management** : ReactJs, Redux, React Query, Redux ToolKit, Context API
- **Styling Libraries** : Bootstrap, Tailwind CSS, Material-UI
- **Version Control** : Git, GitHub
- **Tools** : Webpack, npm, Babel
- **Testing Tools** : Jest, React Testing Library
- **Methodology** : Agile
- **API Testing Tools** : Postman
- **Authorization & Authentication** : JWT
- **Applications** : Visual Studio Code
- **Knowledge Of** : NodeJs, ExpressJs, MongoDB, NEXTJs

EDUCATION

Bachelor of Engineering
Shivaji University

Kolhapur

PROFESSIONAL EXPERIENCE

Front-End Developer
Zetaion System Private Limited

2020-Present

PROJECTS

TIM

Description: TIM is Italy's largest telecommunications provider, offering mobile, fixed-line, broadband, and digital TV services. It is part of the Telecom Italia Group, which has a long history in the Italian telecom market.

Roles and Responsibility:

- Build and integrate reusable components for seamless functionality across different services like billing, subscription management, and support.
- Translate UI/UX design wireframes into high-quality, responsive code using **HTML, CSS, JavaScript, React**.
- Implement smooth transitions, micro-interactions, and animations using CSS.
- Utilized **Redux Toolkit** for state management, enabling real-time updates and efficient data handling across components.
- Integrated backend services using **Axios**, optimizing data fetching and synchronization.
- Developed an Product Catalogue Management Component with dynamic product listings and product details, enhancing data visibility.
- Implemented pagination with **React-Paginate** and search optimization with Lodash Debounce, reducing **API calls**.
- Leveraged **React Query** for data fetching and caching, reducing load times for frequently accessed pages by 20%.
- Collaborated with backend engineers to define API contracts and collaborated with junior developers on front-end best practices.

Techstack : ReactJs, React query, Redux Toolkit, React hook form, Lodash, Tailwind CSS, Axios, ReactPaginate.

Geodis

Description: Geodis is a global logistics provider with a robust presence in Ireland, offering supply chain solutions, freight forwarding, and contract logistics services.

Roles and Responsibility:

- Build and maintain scalable **React.js** applications with high performance and responsiveness.
- Work closely with UX/UI designers, back-end developers, and product managers to translate designs into functional web interfaces.
- Leveraged TypeScript to maintain code quality and reduce runtime errors, ensuring a robust and maintainable codebase.
- Quickly adapted to new technologies like **Typescript** and **Tailwind CSS**.
- Optimize components for maximum speed and scalability.
- Debug and resolve issues in production and staging environments.
- Implemented accessibility best practices to ensure the web application is inclusive and usable for users .

Techstack : ReactJs, React query, Redux, Material UI, Axios, TypeScript, .

Lloyd's Insurance

Description: Lloyd's of London is a well-known insurance and reinsurance market. While not a traditional insurer, Lloyd's operates in Ireland through brokers and agents, providing specialized and high-value coverage.

Roles and Responsibility:

- Design and implement intuitive, responsive, and user-friendly web interfaces for insurance portals and analytical tools.
- Build interfaces for managing policies, claims, and risk data.
- Handle secure data transmission for sensitive insurance information.
- Work within **Agile** teams, participating in sprints and regular stand-ups.

Techstack : ReactJs, Jest, React-Router, CSS.
